

MAYES & SCRINE

EQUINE VETERINARY PRACTICE

Complimentary veterinary talk for our clients on 17th April at 7pm, venue Dawes Farm—Refreshments included

COLIC

Our own Naomi Thomas will be talking about colic, specifically

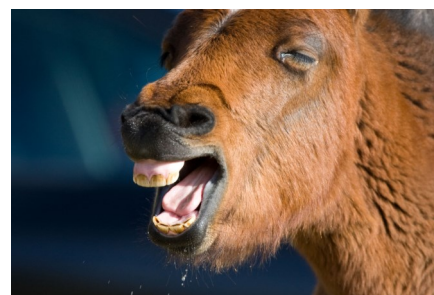

- General types of colic and what causes them
- When do you call the vet and what should you do in the meantime
- What the vet will look for
- What happens if your horse needs a referral
- What happens at surgery

THE COUGHING HORSE

This 60 minute presentation focuses on respiratory disease in horses. Come along to find out about:

- what is normal for a healthy horse
- recognising abnormal clinical signs – how healthy indicators can change when a horse has respiratory disease and what this might mean
- why horses cough - every cough means something
- how to treat and prevent respiratory disease

There will be a Q&A session at the end of the talk.
